

Ex. No. 4: Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

Aim:

To Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

Procedure:

Step 1: Go to zoho.com.

Step 2: Log into zohocreator.com.

Step 3: Select one application step.

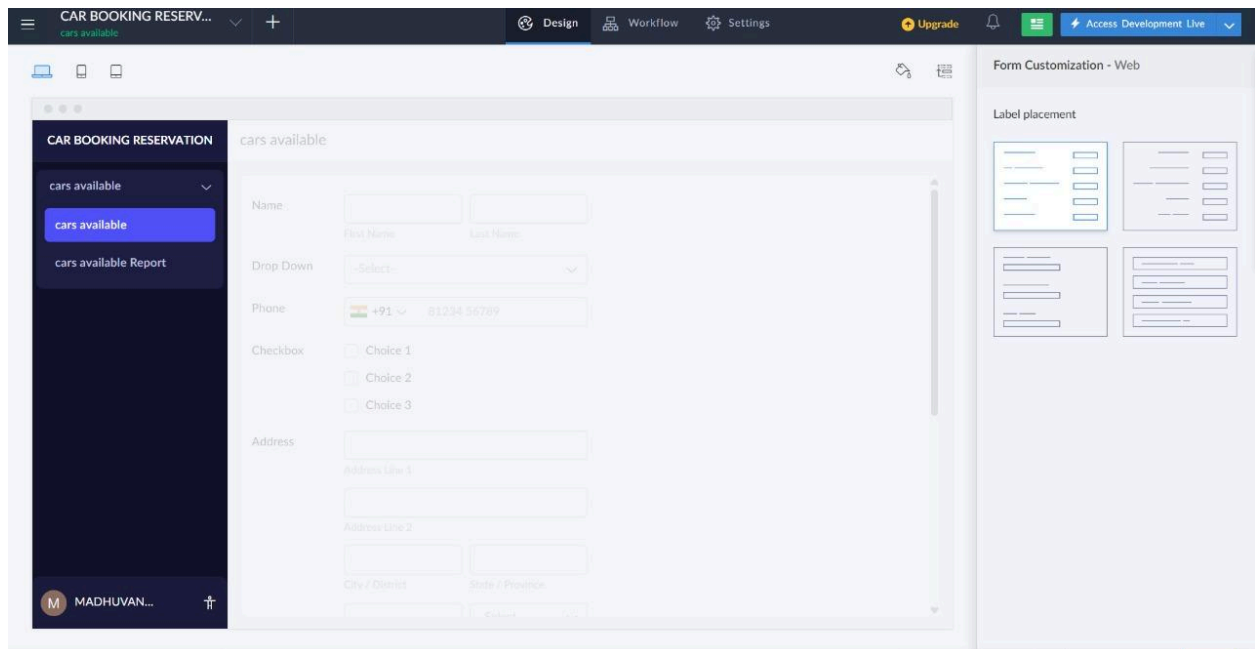

Step 4: Enter application name as Car Booking Reservation System.

Step 5: Created new application as Car Booking Reservation System.

Step 6: Select one form

Step 7: The software has been created.

Implementation:

The screenshot displays the Zoho Creator web interface for a 'CAR BOOKING RESERVATION' application. The top navigation bar includes a hamburger menu, the application name 'CAR BOOKING RESERVATION' with a dropdown arrow, a plus icon, and tabs for 'Design', 'Workflow', and 'Settings'. On the right side of the top bar are an 'Upgrade' button, a bell icon, and a 'Access Development Live' button with a dropdown arrow. Below the navigation bar, the 'Design' tab is active, showing a form titled 'cars available'. The form is divided into two main sections: a left sidebar and a main content area. The sidebar contains a 'cars available' dropdown menu, a 'cars available Report' button, and a user profile section at the bottom with a circular icon containing the letter 'M' and the name 'MADHUVAN...'. The main content area displays the form fields: 'Name' (split into 'First Name' and 'Last Name' text boxes), 'Drop Down' (a dropdown menu with '- Select -'), 'Phone' (a text box with a country code dropdown set to '+91' and a pre-filled number '81234 56789'), 'Checkbox' (three checkboxes labeled 'Choice 1', 'Choice 2', and 'Choice 3'), and 'Address' (split into 'Address Line 1' and 'Address Line 2' text boxes, followed by 'City / District' and 'State / Province' text boxes). On the far right, a 'Form Customization - Web' panel is visible, showing 'Label placement' options with various input field and label arrangement templates.

Result:

Successfully created a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.
